SUMMARY

Computer Science Engineering student with a strong foundation in Software Development and Data Structures & Algorithms. Skilled in JavaScript, C++, React.js, Node.js, and SQL, with hands-on experience building web applications and REST APIs. Building LLM-powered applications using Retrieval-Augmented Generation (RAG), Corrective RAG (CRAG), and LangChain.

EDUCATION

Pranveer Singh Institute of Technology (PSIT), Kanpur 2024 – 2028
Bachelor of Technology in Computer Science and Engineering CGPA: 8.06
Deoria Senior Secondary School — Class XII (CBSE) 83%
Deoria Senior Secondary School — Class X (CBSE) 91.6%

TECHNICAL SKILLS

Languages: C, C++, Python (basic), JavaScript
Web: HTML, CSS, React.js, Node.js, Express.js, Chrome Extensions (Manifest V3)
AI / LLM: Large Language Models (LLMs), RAG, CRAG (Corrective RAG), LangChain, Prompt Engineering, Embeddings & Semantic Search
Database: SQL, Oracle, MongoDB
Core CS: Data Structures and Algorithms, DBMS, OOPS
Developer Tools: Git, GitHub, VS Code

INTERNSHIP

Web Development Intern — HTML & CSS *Sep – Oct 2026*
EWB

- Built and styled responsive web pages using HTML and CSS.
- Practiced semantic markup, layouts, and cross-device responsive design.

PROJECTS

LectureMateAI — RAG-Based YouTube Assistant *LangChain, RAG, CRAG, LLM, Chrome Extension*

- Building a Chrome extension that helps students learn from YouTube lectures without leaving the platform, using a LangChain-based RAG pipeline over video transcripts.
- Enables in-page Q&A so students can ask questions while watching and get context-grounded answers from the video content.
- Generates video summaries and flashcards automatically for quick revision.
- Applied Corrective RAG (CRAG) to evaluate retrieved context and improve answer relevance and reduce hallucinations.

FitX — AI-Powered Fitness Platform *React.js, JavaScript, REST APIs, Node.js, MongoDB, AI*

- Worked primarily as a Frontend Developer, developing responsive user interfaces for an AI-powered fitness platform.
- Collaborated on a full-stack fitness workflow with JWT-secured authentication, Node.js/Express, MongoDB, and an AI coaching component.

DevTracker (In Progress)

- Building a full-stack developer productivity platform to track coding progress, goals, and learning activities.
- Developing responsive UI and backend APIs for efficient progress tracking and data management.

ACHIEVEMENTS

- Solved 130+ problems on LeetCode across arrays, strings, hashing, two pointers, sliding window, stacks, queues, linked lists, binary search, trees, and heaps.
- Earned the LeetCode 50 Days Badge for maintaining a 50+ day problem-solving streak.

CERTIFICATIONS

HTML — Infosys Springboard | Java — Infosys Springboard | DBMS — Infosys Springboard
